PRODUCT OVERVIEW

Signature Motion ECO60™

The versatile ECO60 actuator is designed to be hassle-free, simple and straightforward. We've worked hard to make the ECO60 user-friendly and out-of-the-box ready. No longer will you have to struggle to assemble a multi-piece carriage and base because we consolidated it down to a single-piece design. Our integrated motor mount works with NEMA 17 and can be adapted to a NEMA 23 with a simple expansion flange. With our T-slot extruded base, you now have the freedom to mount the limit sensors wherever you want. The ECO60 has all the durability and compact robustness of its predecessor, but with more simplicity and the freedom to make your project work the way you need it to.

- Travel ranges from 6" to 36"
- Painless limit switch position adjustment sensor
- Stainless steel lead screws with 0.1", 0.2" or 0.5" lead
- Excellent stiffness and rigidity in a small footprint
- Easy repair and component replacement
- Adaptable mounting for NEMA 17 or NEMA 23 motors
- Optional home and travel limit sensors
- Simplified time-saving design

Streamlined Base Design

- Strong and compact single piece design
- Position limit sensors anywhere along the T-slots on either side of the base
- Durable and recyclable hard anodized aluminum

Serviceable Carriage Design

- Hassle-free preload adjustment to the linear base tube
- Fast and easy service with replaceable bearings and liners
- Simplified travel sensor flag to screw hardware
- Wide and strong mounting hole attachment points on carriage
