HANDI-CHEK®

A BIG NAME IN SMALL PARTS

THE HANDI-CHEK DIFFERENCE

- High quality parts (not cheap imports)
- These parts are compliant for installation in OEM components and assemblies
- Each item is labeled with a UPC barcode for retail scanning

Visual Product Layout

Standard on stacking and Big Shot kits

Retail Ready

With GS1 US Barcodes

MULTIPLE SELLING OPTIONS

- Use Handy-Chek to sell more product and better support your OEM or MRO customer.

Sell the whole kit,
not a handful of parts

Create MRO bin stock diagram in plant for use in
your store/business for samples

For detailed specifications and tolerances, visit huyett.com.

Prices, materials, dimensions, tolerances, designs, and grades subject to change without notice. © 2023 Huyett

HANDI•CHEK CONFIGURATIONS

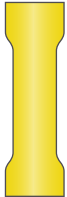

Suitable for OEM Applications

Package Type	Sizes Available	Description
 Tool Sleeve	6-3/4" x 1-1/4" x 1/4"	• Single hanging slot for hanging on a display rack • Clear plastic sleeve allows for easy viewing
 Blister Pack	2-1/2" x 4-1/4" x 1-1/2"	• Single hanging tab to hang on a display rack • Clear plastic clamshell for greater visibility • No special tools needed to open • Snap tight to securely close
 Hanging	5-1/4" x 3-1/4" x 1-1/2" 6" x 4-1/2" x 1-1/2" 8" x 4-1/2" x 1-1/2"	• Double hanging tabs for hanging on a display rack • Translucent polypropylene box • Extremely durable and impact resistant • Perfect for viewing the contents before opening • Three box sizes and multiple configurations to meet the needs of each assortment
 Stacking	7" x 3" x 1-1/2" 8" x 4" x 1-1/2" 9-1/4" x 6-1/2" x 2" 11" x 7" x 2"	• Designed to sit or stack on shelf • Translucent polypropylene box • Extremely durable and impact resistant • Four box sizes and multiple configurations to meet the needs of each assortment
 Big Shot	13" x 9" x 2-1/2"	• Designed to sit or stack on shelf • White opaque box with 24 compartments • Extremely durable box with a heavy duty heat-sealed hinge • Lid overlaps to block out dust and containments

All pins assortments are standard zinc clear plated and inch measurements unless otherwise noted.

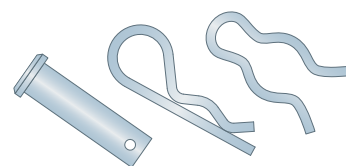

Bridge Pins 9
For hitch pin retention, ideal for applications with frequent disassembly and reassembly.

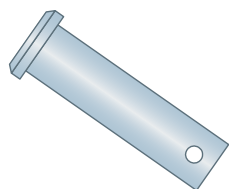

Hair Pins 11
Like bridge pins except they are retained in a groove instead of a hole.

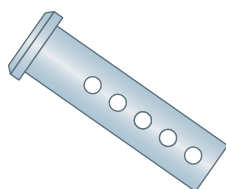

Ring Cotter Pins 11
Insert straight end into the pin hole. The loop locks to add strength and security.

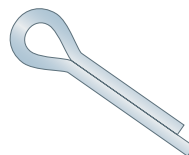

Mixed Assortments 10
A variety of your favorite pins combined in one kit for your convenience.

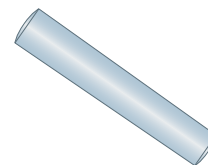

Clevis Pins 12
Quick and secure fastener to replace bolts and rivets. Secure with a bridge pin.

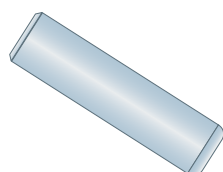

Universal Clevis Pins 13
Multiple holes makes the pin extremely versatile.

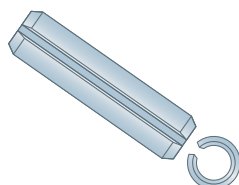

Cotter Pins 14
Installed quickly with no special tools. Self-locking to provide secure fastening.

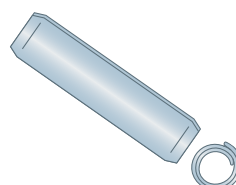

Taper Pins 17
Tapered design allows for pin to become taught as it is driven into place.

Dowel Pins 18
Commonly used to retain parts in a fixed position or to preserve alignment.

Slotted Spring Pins 19
Allows for the pin to flex during installation and tension holds the pin in place.

Coiled Spring Pins 23
The wound design evenly distributes stress and accounts for flexing during application.

Shop Assortment DISP-SHOP270

This versatile kit contains external retaining rings, e-clips, woodruff keys, and slotted spring pins. Find it on page 43.

GREASE FITTINGS

HIGH QUALITY PARTS

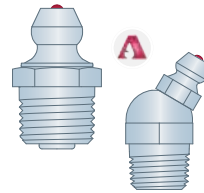

All grease fitting assortments are standard zinc clear plated unless otherwise noted.

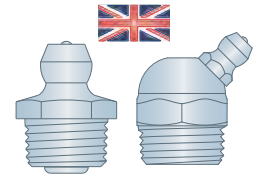

Hydraulic Fittings..... 25
Ideal for applications where greasing is required for proper maintenance.

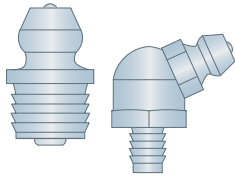

Metric Fittings..... 27
All of your favorite hydraulic fittings in metric threads, dimensions, and body styles.

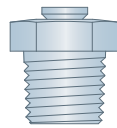

Alemite® Fittings..... 29
Authorized volume distributor of Alemite grease fittings. Identified by a red ball check.

British Fittings..... 29
Caution should be used when measuring these threads, as they resemble PTF threads.

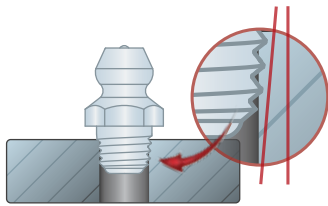

Drive Type Fittings..... 29
Installed without needing a threaded hole, decreasing the cost of installation.

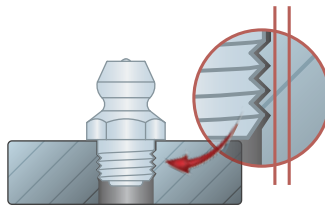

Pressure Relief Vents29
Release excessive pressure accumulated during operation of a bearing housing or gearbox.

TYPES OF THREADS

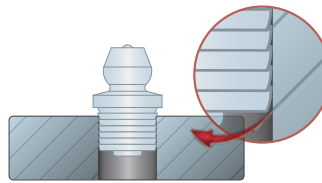

TAPER THREADS

Taper threads run **DIAGONAL** to mating material. They do not seat flush, leaving some threads exposed resulting in less consistently installed heights.

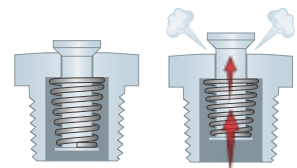

PARALLEL THREADS

Parallel threads run **PARALLEL** to mating material. They seat on the shoulder as a screw would, providing consistently installed heights.

DRIVE TYPE FITTINGS

Drive type fittings have a serrated shank. Typical installation requires driving the fitting into a drilled, untapped hole.

PRESSURE RELIEF VENTS

Consists of a spring that controls a pop-up valve that opens when pressure builds. At peak performance, the valve is closed, sealing the bearing.

Alemite® is a registered trademark of Alemite, LLC, Johnson City, TN, USA.

RETAINING RINGS

HIGH QUALITY PARTS

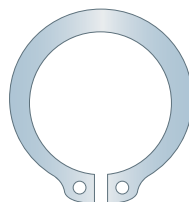

All retaining ring assortments are standard plain (phosphate) and inch measurements unless otherwise noted.

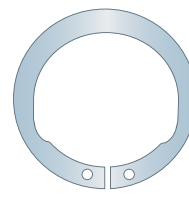

Internal Rings 31
Installed in a housing/bore groove, the assembly is held together by the ring protruding from the groove.

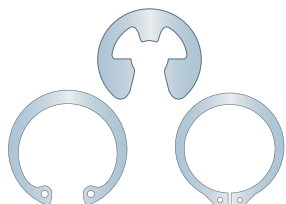

External Rings 34
Once installed on a shaft, the portion of the ring protruding from the groove holds the assembly together.

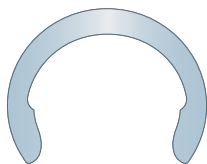

External Heavy Duty 35
The extra thick version of the regular external rings, except they can withstand greater thrust loads.

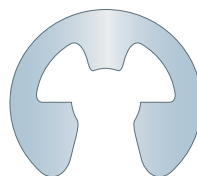

Inverted External 36
Functions like an internal ring, only the lugs are reversed. Ideal for minimal clearance applications.

Mixed Assortments 36
A variety of your favorite retaining rings combined in one kit for your convenience.

C-Clips 38
Ideal for low clearance applications where radial installation is preferred.

E-Clips 38
Three prongs make contact with the groove, providing a shoulder for retention.

Prices, materials, dimensions, tolerances, designs, and grades subject to change without notice. © 2023 Huyett

All machine key assortments are standard zinc clear plated and inch measurements unless otherwise noted.

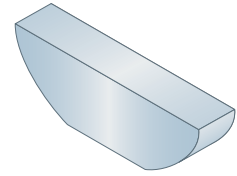

Form B Keys 41
Posses square-end profiles and provide contact with both the key seat and the hub.

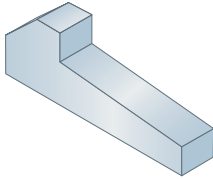

Form A Keys 41
Have rounded end profiles so the key fully fills a milled key way.

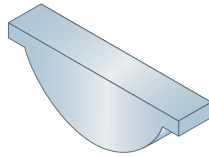

Mixed Assortments 43
A variety of your favorite machine keys combined in one kit for your convenience.

Woodruff Keys..... 44
Used to avoid milling a key way near stress concentration ends of a shaft.

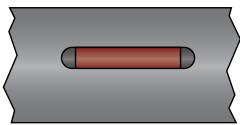

Gib Head Keys..... 46
Tapered machine keys that secure pulleys and gears tightly to the shaft.

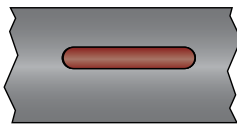

Hi-Pro Keys 46
Like a woodruff key, but these keys have "feet" that prevent rocking and movement in a rounded key way.

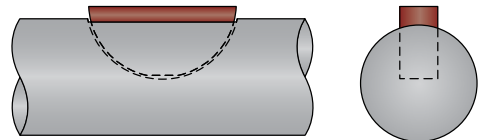

TYPES OF KEYS

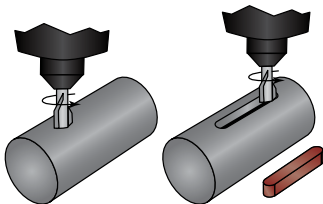

Form B

Form A

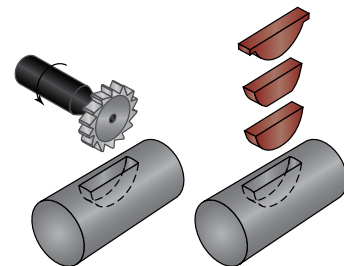

Woodruff Key

MACHINE KEYS

Key ways are typically milled using an end-mill tool. The circular shape of the end-mill creates a slot on the surface of the shaft. Round-end keys occupy the entire slot, while square-end keys leave a void at either end of the slot

WOODRUFF OR HI-PRO

Key ways can be milled axially along round key stock to allow for the use of a variety of half-moon machine key profiles

High Carbon & Stainless Steel Slotted Spring Pins

Connecting & Mounting Clamps, Quick Connectors, Rings, Straps, & Tools

Threaded Inserts, Studs, Rivets, & Tools

Grease Fittings, Grease Guns, Lubrication & Fluid Handling & Management Systems

Coiled Spring Pins, Slotted Spring Pins, Spacers, & Thrust Washers

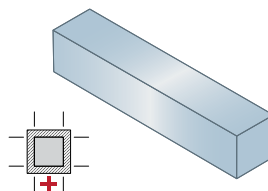

Retaining Rings, Circlips, Spiral Rings, Wave Springs, & Constant Section Rings

All key stock assortments are standard zinc clear plated and inch measurements unless otherwise noted.

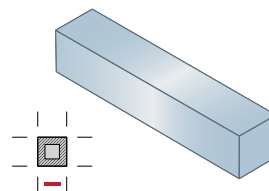

MAK-A-KEY®

CUT, FILE, & FIT KEY STOCK

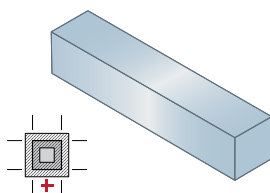

As the market leader in key stock and power transmission components, Huyett is proud to distribute MAK-A-KEY. MAK-A-KEY is the oldest and most well known key stock brand in the world. MAK-A-KEY is known for the slogan "Cut, File, and Fit!" in reference to offering stock material for aftermarket repairs and maintenance of power transmission components.

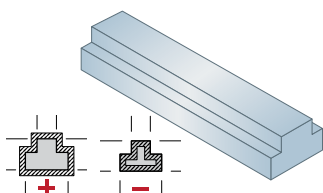

Oversize 49
Actual size of material will be the specified size or slightly larger within allotted tolerance.

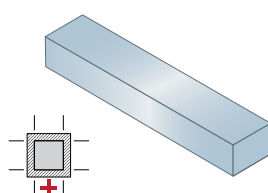

Undersize 50
Actual size of material will be the specified size or slightly smaller within allotted tolerance.

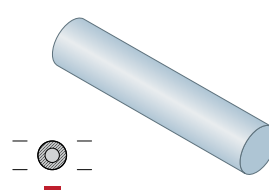

Bilateral 51
Specialty materials with actual size slightly larger or smaller than allotted tolerance.

Step Key Stock 52
Used when worn or damaged key ways have been repaired.

Mixed dimensions 53
Oversize tolerance assortments which possess square and rectangle profiles.

Round 54
Used as a rotating device or to connect or align components.

TYPES OF PACKAGING

Package Type	Sizes Available	Description
 Cardboard Box	12-1/2" x 1-3/4" x 1"	- Designed to sit or stack on shelf - Compact brown chipboard box with tabs to securely close - No Special tools needed to open
 Counter Display	9-1/2" x 13" x 2-3/4"	- Designed to sit on counter or stack on shelf - Standard design with legs that pop out for a counter display and three compartments - Corrugated brown cardboard box that is stapled together for heavy duty use - Ships with an outer box to contain all parts

All fastener assortments are standard inch measurements unless otherwise noted.

Lanyards 49
Also called tethers, lanyards provide attachment between a pin and its mating part.

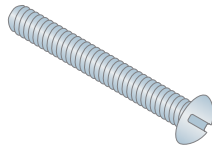

Sq. Head Set Screws 49
Square head allows for tightening with a wrench in low clearance applications.

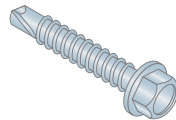

Cap Screws 49
Hex socket allows for tightening with an allen wrench in tight spaces.

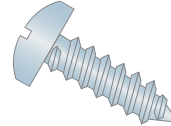

Set Screws 50
Hex socket allows for flush/recessed installation in an application.

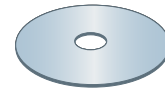

Machine Screws..... 52
Installed in a predrilled hole, pair with a hex nut for maximum hold.

Self Drilling Screws 49
Designed with a notched tip that can easily cut through material without predrilling.

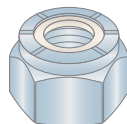

Sheet Metal Screws 52
Fully threaded shank for maximum hold. Pan head for flush installation.

Washers..... 53
Relieve surface friction to prevent loosening when fastening uneven surfaces.

Bushings..... 53
Used to take up slack on shafts in applications and assemblies.

Locknuts..... 53
Resists loosening under vibrations and torque.

HOW TO USE A DIY LANYARD

This DIY kit allows for complete customization of all your lanyard needs. Make a lanyard to the length needed to fit your specific application.

1. Decide which accessories will best suit your application
2. Measure the length of lanyard, and cut with pliers
3. Assemble the components and crimp with the pliers included in the kit

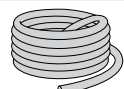

#10 Ring Terminal

Aluminum Sleeve

Stainless Steel Tab

Nylon Coated Cable

Cutting/Crimping Tool

Multiple Options

Lanyards can be constructed in various configurations

ORDER TRACKING

Track your order by clicking on the tracking number in order details.

CARRIER AND SHIP DATE

Confirm your carrier and see the expected ship date.

KNOWLEDGE VAULT

Product training, best practices, and the most comprehensive catalogs in the industry.

QUANTITY BREAKS

Stock up on frequently used parts to save time and money.

CUSTOMER SPECIFIC PRICING

Login today for great prices on high quality fasteners.

All o-ring assortments are Buna-N® material and inch measurements unless otherwise noted.

O-Rings Tools..... 57

Two brass picks used to assist in installation or removal of o-rings.

Buna-N O-Rings 57

Used to create a seal at the interface of mating pieces in a machine design.

EPT O-Rings 59

Ideal for a wide range of temperatures, and for hot water and steam applications.

Silicone O-Rings 60

Red colored general purpose ring with excellent weathering characteristics.

Viton O-Rings..... 60

Brown colored ring ideal for recovery to original shape after compression.

Metric O-Rings 61

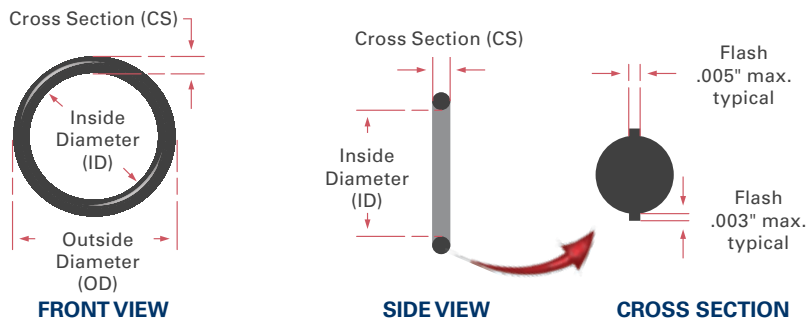

Most popular metric sizes available in Buna-N material.

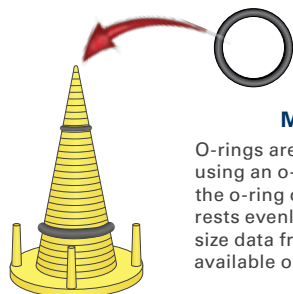

Japanese O-Rings..... 62

Sizing specifically designed for Japan's automotive and manufacturing industries.

HOW TO IDENTIFY

HOW TO USE

MEASURE AN O-RING

O-rings are hard to measure, consider using an o-ring cone for assistance. Place the o-ring on the cone, lowering it until it rests evenly around the cone. Record the size data from the cone. O-ring cones are available on huyett.com.

INSTALL OR REMOVE

Use a brass extraction tool to lift the o-ring out of the channel to repair the application.

For detailed specifications and tolerances, visit huyett.com.
