***Lead-Free Brass
Fittings***

*“It is the policy of Fittings Unlimited, Inc.
to maintain and improve our customer satisfaction by
providing hydraulic and pneumatic fittings and
accessories that consistently meet our customer’s
specified product and delivery requirements.”*

What?

The U.S. Senate Bill 3874 became effective January 4, 2014 which provided a three year timeframe for affected parties to transition to the new requirements. In January 2011, the Reduction of Lead in Drinking Water Act was signed into law, to reduce the allowable lead content of wetted surfaces in drinking water pipes, pipe fittings, and plumbing fixtures.

*California & Vermont (Jan 1, 2010), Maryland (Jan 1, 2012), and Louisiana (Jan 1, 2013) had already adopted lead in drinking water standards that went into effect January 4, 2014.

What does this mean for you?

Your current inventory of leaded brass became obsolete on January 4, 2014. This means you will no longer be able to sell valves, fittings or fixtures that contain lead which exceeds the 0.25% weighted average limit for wetted surfaces.

What are the products affected?

The product affected by this legislation includes all valves, fittings, or fixtures that come into contact with potable water, except those excluded per Federal Public Law 111-380. This includes corporation stops, curb stops, service fittings and couplings, meter valves, meter couplings, copper meter setters and insetters, meter yoke valves, check valves, backflow valves, and more. This also includes any plumbing valves and fittings inside a home that come into contact with potable water.

You will need to refer to local state legislation for further explanation on what pump and plumbing products are specifically excluded from this law in your state.

How can I be sure?

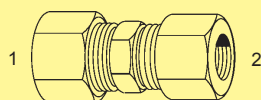

Federal law does not require listing, labeling, markings or third party certification indicating whether a product meets NSF Standard 61, Section 9. However the absence of such Federal requirements does not preclude State or local governments from adopting such requirements. Check with your State or local jurisdiction to determine whether if they require labeling of certification for the product.

What will Fittings Unlimited Inc. do for you?

Plain and simple, our suppliers are compliant. Our part numbers contain **LF** as a prefix to designate Lead-Free (Low Lead) Fittings. We have offered our customers these fittings since 2010. FUI was proactive to help you separate your inventories before it became a national law. Along with our current catalog fittings, we have a wide array available as specials.
